About Me

Dedicated and determined computer engineer. Eager to work and use my skills to help the company that I will be working in. A Combination of both hardwork & smartwork.

Projects & Work

Took an advanced HTML5 and CSS3 course while studying full-time

Developed an app in 5 days

- Developed a fully-operational mobile app for child abuse prevention using HTML, CSS, and JavaScript in only 5 days.

Build an application consisting the following:

- arrow functions, destructuring, spread operator, default arguments, optional chaining
- functions: arrow functions, first-class and higher-order functions, bind, and closures.
- object-oriented programming: prototypal inheritance, constructor functions (ES5), classes (ES6), encapsulation, abstraction, inheritance, and polymorphism.

Build placement cell website

- Webite with Chatbot in it.
- Included with React framework.
- Used MongoDB for database.

Understanding of the following Web development skills:

- DOM Manipulation
- Bash Command Line
- Git, GitHub and Version Control
- APIs
- Databases
- SQL
- MongoDB
- Mongoose
- Authentication
- Firebase
- Web Design
